VEMPATI HARSHA

Kurnool, Andhra Pradesh | 7416070400 | vempatiharsha457914@gmail.com

CAREER OBJECTIVE

Motivated Computer Science undergraduate with a 8.4 CGPA and strong foundations in backend systems and AI-driven applications. Seeking to leverage expertise in Python, C++, and API integration for software development roles.

EDUCATION

- **B.Tech in Computer Science & Engineering** | IIIT Kottayam (2024 – 2028) | **CGPA: 8.4/10**
- **Class XII (Senior Secondary)** | Sri Chakra Bhavan (2024) | **95.00%**
- **Class X (Secondary)** | Sri Chaitanya School (2022) | **95.00%**

TECHNICAL SKILLS

- **Languages:** Python, C, C++, Java, JavaScript, PHP, SQL
- **Web & Frameworks:** Flask, HTML5, CSS3, SQLite
- **Developer Tools:** Git, Gemini API, Blender 3D, Linux
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

KEY PROJECTS

Binance Futures Trading Bot | Python, REST API, python-binance

- Engineered a modular CLI tool for executing Market and Limit orders on the Binance Testnet.
- Implemented an automated **Rule Engine** that fetches live exchange filters to validate minimum notional values and precision.
- Developed a "Cleaning" algorithm to auto-round quantities and prices to match symbol-specific step sizes, reducing API errors by 100%.

AI Content Detector & Humanizer | NLP, Python, Flask

- Developed a system to identify AI-generated text using NLP techniques.
- Built a companion tool to convert AI-generated content into more human-like, readable language.

Flight Booking Management System | Java, SQL, Backend

- Designed a comprehensive backend system for managing flight schedules and user bookings.
- Optimized database queries for real-time schedule updates and reservation management.

CERTIFICATIONS

- **Java Programming** – Coursera
- **Java Fundamentals** – Coursera
